Few Cold War capers approach the sheer daring and treachery of the spy George Blake. After fighting in the Dutch resistance during World War II, Blake joined the British spy agency MI6 and was stationed in Seoul.

Taken prisoner after the North Korean army overran his post in 1950, Blake later returned to England to a hero's welcome, carrying a dark secret: while in a communist prison camp, he had secretly switched sides to the KGB. As a Soviet double agent,

Blake betrayed uncounted western spying operations--including the storied Berlin Tunnel, the most expensive covert project ever undertaken by the CIA and MI6. Blake exposed hundreds of western agents, forty of whom were likely executed. After his unmasking and arrest, he received, for that time, the longest sentence in modern British history. Much of Blake's career existed inside the hall of mirrors that was the Cold War, especially following his sensational escape from Wormwood Scrubs prison. Now that the master spy has died, veteran journalist Simon.

Solidly researched, comprehensive and insightful, this is an illuminating and informative biography of double agent George Blake. Author Simon Kuper is a journalist, so it's not surprising that he takes a more journalistic approach to his subject rather than writing a more scholarly cradle-to-grave biography, but it's no less worthwhile for that. Kuper spent some time with Blake and these interviews are completely fascinating, adding to a more rounded portrait of an ultimately inscrutable man. Engaging, accessible and a really enjoyable read. A well told tale exploring the complex character and motivations of one of the KGB's most valuable double agents. "Without [strong]

**MORE BOOKS FOR U...**

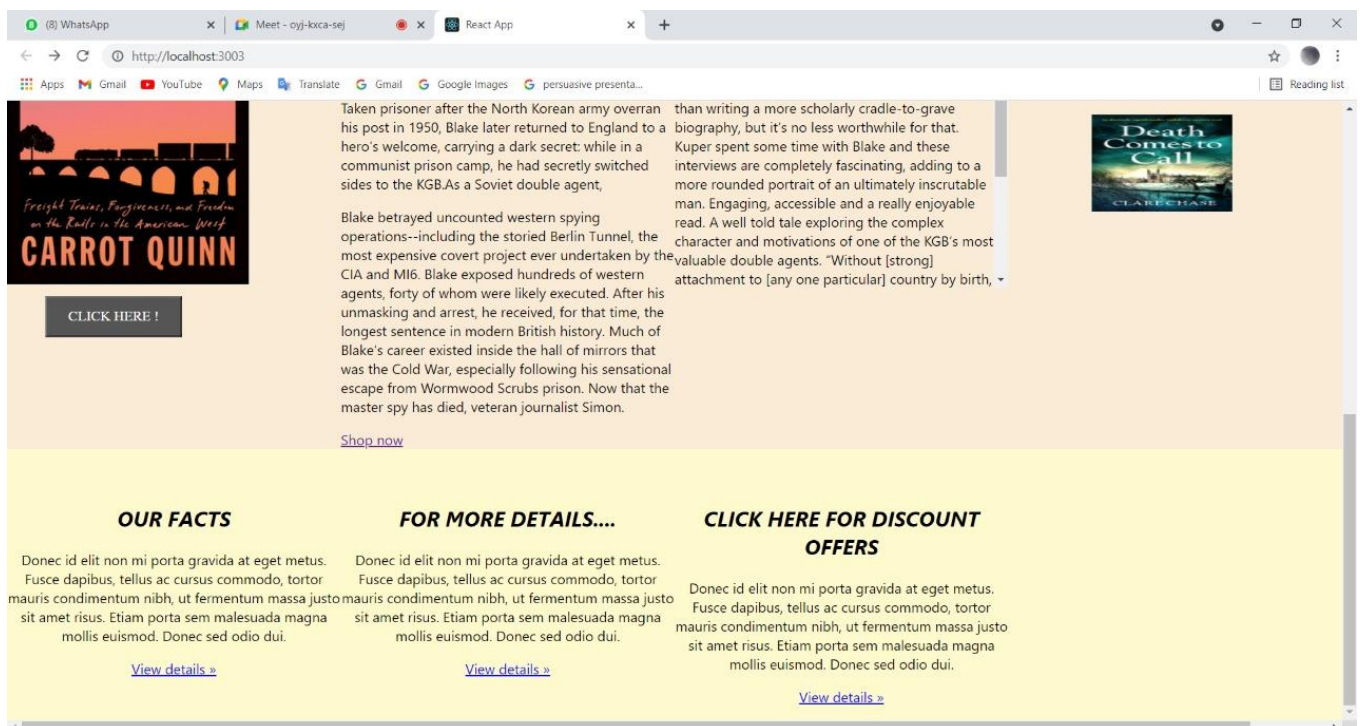

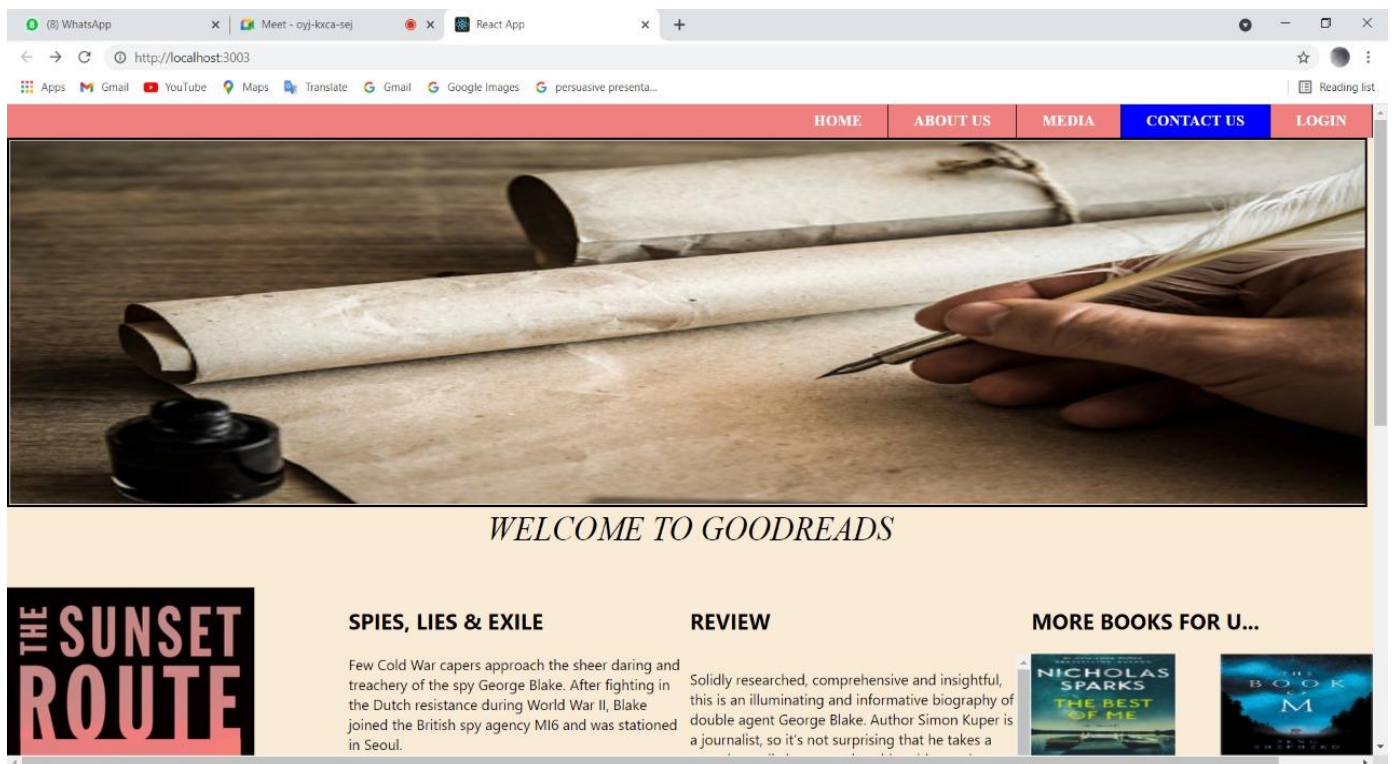

**Date: 12/08/2021**

On this day, we are given an overview of Reactjs. How to initialize react app in visual studio, setting up the react environment and how to run the react application. Also we have been given an overview of how to modify the react application and how to use one file in second one. What is the use of props and how to use them in function and class. Then we were given an assignment in which we have to convert assignment 3 in reactjs.

### **Screenshot of the assignment:**

**Date: 13/08/2021**

On this day, we were introduced to VS CODE extensions for reactjs and HTML like Visual Studio IntelliCode, Path Intellisense, IntelliSense for CSS class names in HTML and ES7 React/Redux/GraphQL/React-Native snippets. We were also told about functions, variable, operators, JSON objects, looping of array via map and foreach and manipulating html by js (getElementById or something else like queryselectors). Then we became familiar with bootstrap grids and bootstrap classes for text formatting and background formatting and then we were given homework to revise bootstrap.

**Date: 14/08/2021**

There was a doubt clearing session for the previous session and the concepts taught in the previous session. After the session there was a weekly test in which we were asked some questions and also write the code for the output questions. Also, we were told to register ourselves in certification course in Responsive Web Designs at Free Code Camp and were informed to submit the certificate by the next week.

**Certificate of the Course:**

### **Weekly summarization of the above activities:**

So basically, during this week, we were taught how to create a front-end development and how to work more efficiently.

- **Feedback for Trainers:**

I think this week overall was great. In a difficult environment, this week session was still effective and very informative. It helped me formalize and think more deeply about the work I do. Excellent trainers – enthusiastic, well informed, engaging, patient, and makes learning fun and easy, great job of getting as much engagement as possible in fully virtual setting. Made difficult concepts very simple to understand for a person from non-computer background.
